The safety and security of the AU community at AU Centers Abroad is of paramount priority, and the safeguards in this plan are designed to mitigate the risk to members of our community of contracting COVID-19 and transmitting it to others.

The following health and safety measures are in effect for Summer 2022 at the AU Brussels Center:

- **COVID-19 Vaccination**: All students, faculty, staff, and individuals who live in the homestay that are eligible for COVID-19 vaccination, will be required to be vaccinated against COVID-19. Please refer to the [Health and Safety Directive: Mandatory COVID-19 Vaccination](#) for further information.

- **COVID-19 Boosters**: All students will be required to receive a COVID-19 booster at least two weeks before the program start date. AU will consider requests for exemptions from the booster for the following circumstances: medical or religious exemptions already approved by AU; students who are currently outside of the United States and not eligible to receive a booster in their host country; and students who are in the United States and not eligible for boosters by the program start date. These exemption requests will be considered on a case-by-case basis.

- **Testing**: Given COVID-19 variants, all fully vaccinated students, faculty, and staff may be subject to periodic surveillance asymptomatic testing at the university’s discretion throughout the semester. Any person experiencing COVID-19 symptoms, regardless of vaccination status, must get a COVID-19 test. Please refer to the [Health and Safety Directive on COVID-19 Exposure, Positive Test, or Suspected Infection](#) for further information. Once on-site, students, faculty, and staff who are not fully vaccinated will be required to be tested for COVID-19 twice a week at the AU Center designated testing location. According to the [Embassy of Belgium in the United States](#), fully-vaccinated U.S. citizens may travel from the United States to Belgium without any prior testing if they can present a [valid vaccination certificate](#). Both CDC vaccination cards and state-issued vaccination certificates are accepted as valid proof of vaccination. Please note that airlines decide under which conditions they carry passengers. It is recommended students inquire with their airline directly about any conditions/requirements for travel. Belgian regulations do not require testing prior to arrival in Belgium for vaccinated travelers. Upon arrival in Brussels vaccinated students do not need to quarantine or get tested.

- **Health and Safety Pledge/Acknowledgment**: All students will be required to sign a Health and Safety Pledge that they will abide by all health and safety regulations imposed by the university, the AU Brussels Center, and local government directives...
Risk Mitigation – AU Brussels Center

regarding COVID-19 restrictions, regulations, and isolation and quarantine procedures.

- **Medical Care:** Students have [ACE insurance](#) for emergencies. It is recommended that students keep their US based medical care insurance while abroad. There are ample medical facilities within a short distance of the AU Brussels program center and UCL campus where the center is located. Students can receive medical care for COVID-19 and non-COVID-19 related medical needs at the general practitioner’s office located close to the Saint-Luc UCL Clinic. If deemed necessary, the general practitioner will advise consultation at the hospital. The hospital [Saint-Luc UCL University Clinic](#) is within a short walk of the AU Brussels Center and has a wide range of specialized medical care and a 24/7 emergency care. AU Abroad recommends that students purchase supplemental international travel insurance to cover routine medical care while in Belgium.

- **Contact Tracing:** Any student, faculty, staff, and host family member must report COVID-19 exposure/positive test result to the AU Brussels program staff. Belgium’s National Contact Tracing does follow up.

- **Face Coverings:** Faculty, staff, and students are required to follow local guidance regarding face coverings. American University and AU Brussels reserve the right to exceed these guidelines and impose requirements for face coverings. When outdoors, all individuals must comply with the requirements as established by the UCL campus site and as required by Belgian and Brussels regulations. See: [https://www.info-coronavirus.be/en/faq/](https://www.info-coronavirus.be/en/faq/).

- **Personal Health Precautions:** In addition to wearing face coverings as noted, members of the AU community are expected to exercise personal health precautions through practicing frequent hand washing and respiratory etiquette and seek medical care if symptoms warrant. These precautions not only reduce the risk of COVID-19 infection but also the spread of infectious disease in general. Students, faculty, and staff with signs or symptoms of infectious illness should stay home and seek medical care.

- **Positive Test Reporting and Self-Isolation:** Students who test positive for COVID-19 must notify AU Center program staff. The person who tests positive must isolate and follow the regulations as required by the government. The person can resume normal activities according to health and safety regulations or medical advice. AU Center staff will coordinate isolation for a student who tests positive.

- **Exposure to COVID-19:** A person is considered a high-risk contact if they were in contact with an infected person for some time (more than 15 minutes) and in close proximity (within a distance of 1.5 meters). If a person is fully vaccinated and is exposed, it is recommended that they get a COVID-19 test and comply with local regulations regarding high-risk contact [https://www.info-coronavirus.be/en/contact-tracing](https://www.info-coronavirus.be/en/contact-tracing). If a
Risk Mitigation – AU Brussels Center

person is contacted by contact tracing, they would need to follow the instructions from contact tracing related to testing and quarantine. In case of a positive test result, the person would need to immediately inform AU Center staff, isolate, and follow a doctor’s advice. AU Center staff would coordinate isolation arrangements for the student.

- **Physical Distancing**: It is advised to keep social distance as much as possible. Wear a mask if social distance cannot be maintained. [https://www.info-coronavirus.be/en/faq/](https://www.info-coronavirus.be/en/faq/)

- **Personal Protective Equipment (PPE)**: Faculty, staff, and students are expected to bring their own face coverings and use them if required by AU Brussels or according to local guidance. Face coverings will be provided for individuals who forget or lose their face coverings.

- **Cleaning**: The homestay family will clean the student’s bedroom on a regular basis. The student is responsible for keeping the bedroom tidy. The AU Center facilities are disinfected every day the students are on site, especially the areas with the highest influx of students, professors, and staff. All frequently touched surfaces (door and window handles, light switches, bathrooms, handrails, desks, etc.) will be cleaned regularly.

- **Facility Air Quality/Water Quality**: AU Brussels classrooms are equipped with a state-of-the-art ventilation system and with windows that can be opened. A CO2 meter is available for monitoring the air quality. Students should carry a personalized bottle of water (marked with their name).

- **Classrooms**: All classroom are spacious. Desks will be spaced according to the regulations of the host UCL campus where the AU Brussels Center is located.

- **Housing**: AU Brussels students live in program arranged homestays. All individuals who live in the home that are eligible for COVID-19 vaccination are vaccinated. Students and host families are not required to use a face covering in the homestay except in cases of suspected exposure or positive COVID-19 test result. Students will have their own bedroom separate from that of the homestay family. If a student is exposed or tests positive with COVID-19 and needs to isolate, students will quarantine within the homestay or in separate accommodations arranged by the program. If a homestay family member tests positive, then the AU student will be temporarily placed in the program-arranged separate accommodations or another host family during the family’s isolation. The AU Brussels Homestay Coordinator will manage this process.

- **After Official Program End Date**: In case of isolation needs after the official program end date, AU Brussels will arrange separate accommodation at the students’ cost.
Risk Mitigation – AU Brussels Center

- **Internships**: All sites are vetted for COVID-related protocol by the AU Brussels Internship Coordinator prior to placing any AU student at an internship. Policies related to COVID-19 have been added to the internship contract which is signed by the AU Brussels Director, the internship site’s supervisor, and the student prior to starting the internship.

- **Excursions**: Program field trips for Summer 2022 will proceed pending public health guidelines during the semester and are reviewed by AU Risk Management. AU will conduct a thorough medical services review for all program sponsored field trip locations.

- **Independent Travel**: Independent travel away from the program site will depend on several factors, including the state of the pandemic, local and international travel restrictions, and guidance from national, local, and U.S. authorities. Due to these uncertainties, AU strongly discourages students from engaging in any independent travel and reserves the right to restrict certain locations/countries as may be deemed necessary while students are on the Belgium portion of the program. AU cannot extend any support for independent travel. Students who choose to travel away from the program site on non-program travel will be responsible for any inconveniences or costs incurred resulting from local restrictions or requirements. Additionally, if students are prevented from returning to the program site while traveling independently due to transport delays, local restrictions or border closures, any missed classes or required program activities will be deemed unexcused absences and will result in negative consequences as per our academic policies.
